OVER

9. State law requires submitting to the Virginia State Board of Health a report on the construction and use of every well made in the State intended for water, or any other non-saline use. This information must be submitted whether the well is completed, on standby, or abandoned. Information required includes: an accurately and appropriately prepared water well completion report, full data from any aquifer pumping tests, drill cuttings taken at ten foot intervals (unless exemption is granted), the results of any chemical analyses, and copies of any geophysical logs. Quarterly pumpage and use reports are required from owners of public supply and industrial wells. County or State permits to drill may be required in some parts of the state. Some counties require submission of a water well completion report. The Virginia State Health Department requires a water well completion report for public supply wells.
