9. State law requires submitting to the Virginia State Water Control Board information about groundwater and wells for every well intended for water, or any other non-exempt well. This information must be submitted whether the well is completed, on stand-by, or abandoned. Information required includes: an accurately and completely prepared water well completion report, full data from any aquifer test, cuttings taken at ten foot intervals (unless exemption is secured), the results of any chemical analyses, and copies of any geophysical logs. Pumping and use reports are required from owners of public supply and industrial wells. County or State permits to drill may be required in some counties. Some counties require submission of a water well completion report. The Virginia State Health Department requires a water well completion report for public supply wells.
